

MARIPROject

Project Management for SAP Business One

Mobile Project Management with the MARIPROject App

Small and Midsize Businesses
Professional Services,
Engineering and Construction Industry

Relevant Information Always At Hand

Mobility is an essential factor for the success of your project. Whether general manager, consultant, project manager, sales or service employee: All rely on up-to-date customer and project data - at any time. MARIPROject supports this requirement with the MARIPROject App.

Business Partner Data

With the MARIPROject App, you always have access to relevant master data, whether of customers, leads or vendors.

Up-To-Date Project Data

You can access current project data such as phase status, analyses or documents.

Project Hours and Travel Expenses

On the go, employees may capture working hours, items and travel expenses and assign them to projects. In no time, planned times can be converted to recorded project times.

Approval / Requests

The app enables standard users to make vacation and flextime requests. Professional users, such as project managers or general managers, can

approve requests on the go. Sales quotations above a certain amount can also be approved mobile.

Support Tickets

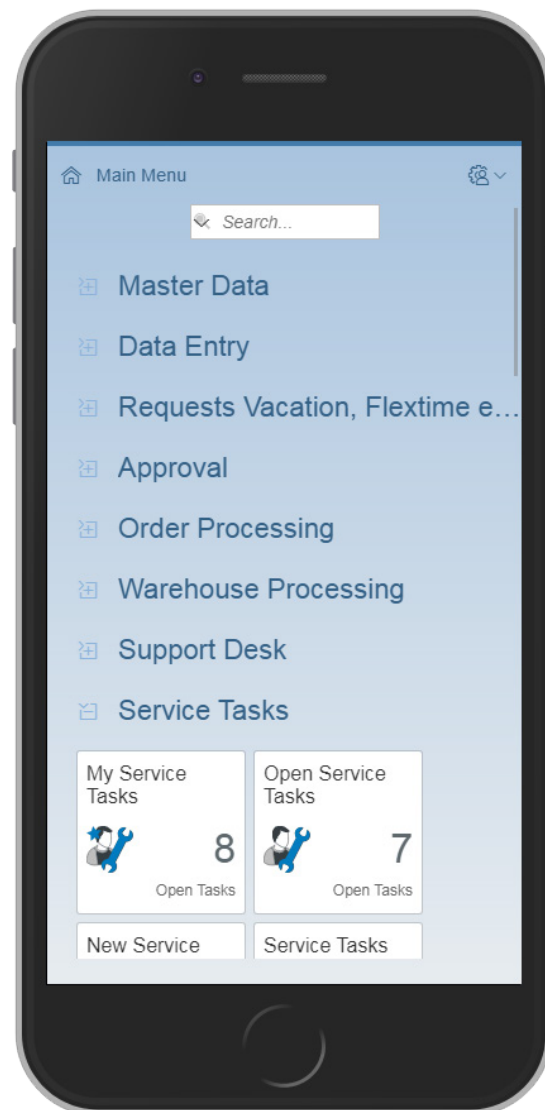

Customers as well as employees can log and edit software tickets or assign them to colleagues. Employees can also record their processing time and directly assign it to the ticket.

Service Tasks

The same applies to service tasks, for example maintenance or repair orders. You can also keep track of your maintenance plans.

Material Requirement

Employees use the MARIPROject App to make material requirements requests for projects. Employees in the back office procure the material or send it to the required location straightaway.

Main menu of MARIPROject App.

Bar Code

MARIPROject supports bar code and QR code® detection.

Equipment

You are also able to manage the use of project equipment on the go.

Analyses / Dashboards

Analyses such as the project or phase report are available online. You can filter the data by various criteria, for example by employee, service, travel expenses or item. In addition, graphical project dashboards belong to the scope of delivery.

Events

Keep track of your events even on the go with the event overview, participant overviews and registration overviews.

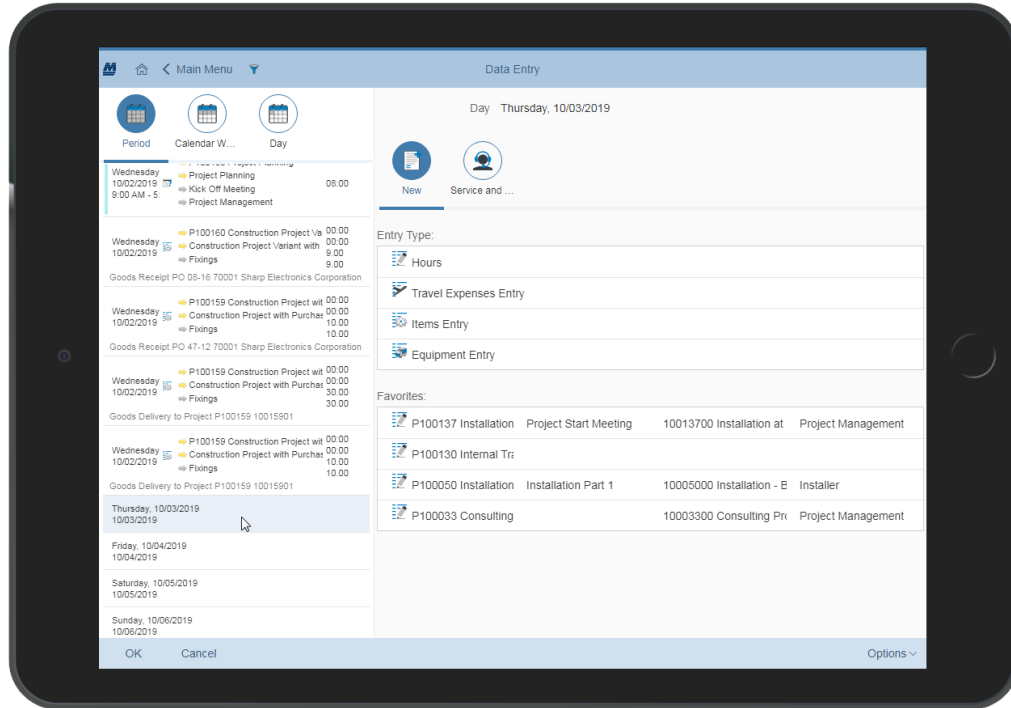

Supported Devices and Operating Systems

Operating Systems:

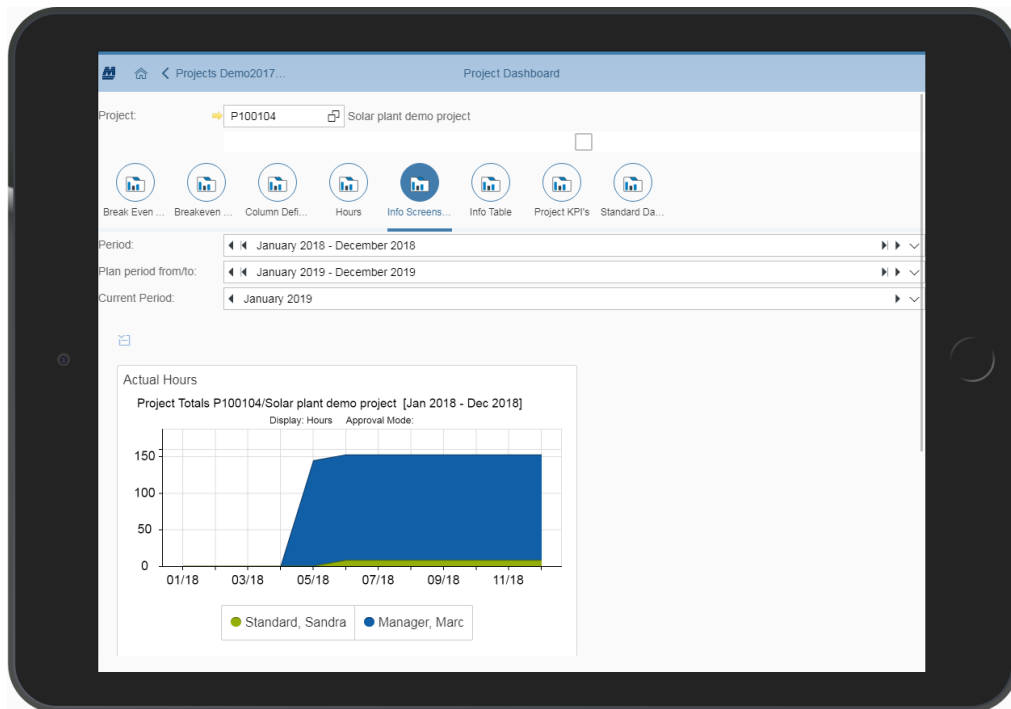

Apple iOS (iPhone, iPad, ...) from version 9.0, Android.

Browsers:

Safari, Chrome, Firefox.

Data Entry in MARIPROject App.

Project Dashboard in MARIPROject App.
