

Press Release

ProjectManagement based on SAP Business One changes in MARIProject

Cologne, 05/16/2014 MARIINGO now announces that the name "ProjectManagement based on SAP Business One" changes in "MARIProject". "This change has two main reasons: On the one hand, the name "ProjectManagement based on SAP Business One" is quite long and customers and partners often use the shortened form. On the other hand, SAP will include some project management functions in version 9.1 of SAP Business One what requires a clear differentiation of the functional areas.", say the two managing directors, Ingo Neufert and Peter Sauermann.

ProjectManagement based on SAP Business One has been developed by MARIINGO Computers in Cologne (Germany) for small and midsize businesses working on a project-oriented basis. The software supports the entire project workflow: from calculation and planning to billing. ProjectManagement is based on the ERP software SAP Business One.

MARIINGO Computers is a software development and consulting company based in Cologne, Germany. Since its foundation in 1986, the software development company has been specialized in the development of business software solutions. The software solution MARIProject for SAP Business One is specifically designed for the planning, accounting and controlling of projects in the professional services or ECO industry.
