

Press Release

MARINGO's solution "MARIProject" has been certified for integration with SAP Business One on SAP HANA.

The solution extends the application SAP Business One powered by SAP HANA by project management functionalities.

Cologne, 16/05/2014 – MARINGO Computers GmbH today announced its project management solution "MARIProject 4.9.004", previously known under the name "ProjectManagement based on SAP Business One", has certified by SAP AG as Certified Integration with Applications on SAP HANA. The solution MARIProject has been proven to integrate with SAP Business One powered by SAP HANA. In this way, MARIProject provides also small and midsize businesses convenient functions for project management.

The certification of MARIProject 4.9.004 with the latest version 9.0 of SAP Business One powered by SAP HANA confirms the existence of product features in accordance with SAP certification procedures. Among others, the following functions have successfully passed the SAP test: installation wizard, creating projects, generating sales and purchasing documents for a project, travel expense accounting for employees, work in progress evaluation and adding business partners in the Web Client.

"We are pleased that we have achieved the certification for MARIProject", says Ingo Neufert, managing director of MARINGO Computers." The certification reaffirms our ambition to offer customers innovative software solutions. In addition, it confirms the integration of MARIProject with SAP Business One. Our customers can focus on their own business. The comprehensive analyses of MARIProject help them to keep their projects under control."

MARINGO Computers has been SAP Software Solution Partner and Technology Partner for several years. In the program, partners work with SAP to develop and to certify the interfaces of their solutions to SAP software. Integrated partner applications extend, complement and optimize SAP solutions and help joint customers to be more successful and to achieve better results.

MARINGO Computers is a software development and consulting company based in Cologne, Germany. Since its foundation in 1986, the software development company has been specialized in the development of business software solutions. The own developed integrated software solution MARIProject is specifically designed for the project calculation, planning, accounting and controlling of projects in the professional services or ECO industry.
