“The solution enables us to work with a single, accurate source for all critical, up-to-the minute business data. This gives managers a complete view of the status of current projects.”

Friedrich Hörauf, Managing Director, GCA projektmanagement + consulting gmbh

GCA projektmanagement + consulting gmbh is in charge of construction projects of different sizes all over the world. The company founded in 1979 and headquartered in Nuremberg (Germany) is an accomplished blend of an engineering firm and management consultancy with decades of experience in project work.

The company has used four different systems for planning and project data so far; the administrative effort was accordingly substantial. Therefore, GCA now relies on the solution ProjectManagement by MARINGO Computers GmbH based on SAP® Business One. All project data is available in a unique system, from the customer request and the resource and budget planning to the closing of accounts.

GCA's consultants access the business software directly over the Internet, capture their working hours and account for travel expenses. The internal cost accounting analyzes these data. This gives project managers an immediate overview of the status of their projects, even if it concerns projects in Dubai or Spain. The result: A solid ground for quick decision-making.
